**NEoWave Logic:**

**Complex Correction** (from black arrow)

The price-time projection (blue rectangle) for wave-X, predicted 6 months ago, is so far proving almost exactly correct. The depth of wave-X is allowed to be a little more than shown but its lowest point should occur before the green vertical line is reached.

**NEoWave Analysis – WEEKLY Structure**

My multi-century Wave count (last page of Mastering Elliott Wave) projects the Dow will exceed 100,00 (maybe even 200,000) by the year 2065! On this chart, wave-(A) ends far above its lowest point, which implies strength; wave-(B) is unfolding well above wave-(A)'s high, which also implies strength. Those signs of future power are essential in bringing my multi-century bull market scenario to fruition.
